

STEPS for OAuth 2.0

1. Go to **setup > Integration > Manage Integrations > new**
2. Fill up (name)
3. Uncheck TBA, uncheck the authorization code grant 2.0 (using redirect url), check the client m2m (with certificate to generate access token)
4. Check scope (restlet, rest web services)
5. Uncheck user credentials (this is for Basic Auth)
6. Click save and you will see Consumer key / client client & consumer secret / client secret (save this in a safe place)
7. Next, go to setup > Integration > OAuth 2.0 Client Credentials (M2M) Setup - this requires certificate from the client, user (Musni Rheinfalz C.), application (created integration record), role ()
8. Next, POSTMAN.
9. Create environment for your integration
